Who we are

Advancing our impact for the greater good

At 3M, sustainability is tied to shared global needs. For the world to have a sustainable future, many challenges must be addressed, including the limited availability of natural resources, lack of access to education and health care, inadequate food supplies, rapid urbanization, stressed water systems, and a global climate crisis. In 2021, we continued to help the world respond to COVID-19, while managing the additional supply chain and logistics challenges of the COVID-19.

We understand that our impact, as we improve our business, our planet, and every life, can be far greater when we collaborate with our customers, communities, and governments. From our highly collaborative work environment to our community of scientists and **51 core Technology Platforms**, we have the resources and the desire to help make a real difference in the world.

Sustainability is a core commitment of 3M, and we recognize and consistently seek opportunities to do more. This is the story of how we are doing it — setting aggressive goals, incorporating sustainability into every new 3M product, and using science to make the world more sustainable for future generations. And we aren't doing it alone.

This is the continued story of our purpose: **#improvinglives**

Sustainability is a core commitment of 3M, and we recognize and consistently seek opportunities to do more

Leading with purpose

Our commitment

For over 120 years, we have been dedicated to science and exploration, taking on global challenges and developing solutions for our customers. As a company, we are guided by our Purpose, Promise, and Principles in the pursuit of creating unique and differentiated value for customers, shareholders, and our stakeholders.

Our Purpose

Unlock the power of people, ideas, and science to reimagine what's possible

Our Promise

Improve lives by helping solve the world's greatest challenges

Our Principles

Science-based performance

Unparalleled expertise, extraordinary outcomes

Makers of what's next

Strength in collaboration

Change for good

All of these bind us together as one 3M, unified in our ambitions and empowered to act to drive growth, development, reputation, and impact with every action. These collective ideals correspond to expectations from our customers, investors, and our employees, and they work in concert with our foundational strengths and priorities for long-term growth:

Our Strengths

Technology

Manufacturing

Global Capabilities

Brand

Our Priorities

Portfolio

Transformation

Innovation

People & Culture

Our Strategic Sustainability Framework

Our corporate Promise culminates in our ambition to help transform businesses and improve every life. Together with our Principles, these elements drive and inform our approach to sustainability through the **Strategic Sustainability Framework**, which directs 3M's efforts to areas where we can make the greatest impact. Our goals and environmental, social, and governance (ESG) metrics reflect a heightened commitment to thinking holistically about how our operations, people, and products can all contribute to a better and brighter future.

We have set clear commitments and an ambitious, long-term strategy that will leverage our passion for science. Our intent is to use a science-based approach to reimagine what's possible, inspiring progress to transform aspirations into action, and tackling the challenges that are most material to 3M and critical to our planet and the people living on it. Building on our global capabilities and diverse technologies, we apply our expertise to create bold ambitions and shape a sustainable future in three priority areas.

Science for Circular

Design solutions that do more with less material, advancing a global circular economy.

To create a more sustainable world for future generations, we must reimagine our current global economy's linear business model of "take, make, and waste," which is depleting natural resources like water faster than they can be replenished and straining ecosystems. In its place, a circular model would only use these essential resources while having a net positive impact on their supply and eliminate reliance on non-renewable, finite resources altogether. It would measure business success in large part on the ability to do more with less, keep products and materials in use, design out waste and pollution, and restore and regenerate natural systems. At 3M, we see the circular economy as an opportunity to inspire leadership, innovation, and disruptive change across all industries, meeting the needs of current and future generations.

For more information, see the **Circular materials** section.

Science for Climate

Innovate to decarbonize industry, accelerate global climate solutions and improve our environmental footprint.

The impacts of global climate change have never been more clear for business and for our communities. Extreme weather events, rising sea levels, elevated pollution levels, poor air quality, and resource scarcity have underscored the urgency with which corporations must act in an effort to slow these harmful effects on behalf of our planet and its people. At 3M, we are accelerating our ambitions through bigger long-term and intermediary goals and actions that align with the latest findings by the Intergovernmental Panel on Climate Change (IPCC). We expect to invest heavily in both our efforts to meet our environmental goals, which include achieving carbon neutrality by 2050, and in our innovation, adapting our business to grow in sectors that support decarbonization. We believe that by working together with our employees, customers, suppliers, government, and communities, we can help drive the systemic change needed.

For more information, see the **Climate and energy** section.

Science for Community

Create a more positive world through science and inspire people to join us.

The global pandemic brought to light the critical role that science must play in our communities. From helping in the fight against COVID-19 to preparing customers for future events, 3M is committed to applying science to support public health and safety for communities around the world. Furthermore, it is through science, innovation, and collaboration that we believe we can help solve some of the world's other great challenges like climate change, health care inequality, and other inequities adversely affecting our communities. The success and growth of our business hinge on the success and growth of all of our communities, so we recognize the importance of equal access to science, technology, engineering, and mathematics (STEM) education and careers as well as the need to advance diversity, equity, inclusion, and social justice within our company and community. Together, we will lead and design an equitable and sustainable future for all.

For more information, see the **Communities** section.

Our actions

When it comes to strategic planning, collaborations, environmental and social goal setting, and reporting, we seek and rely on both internal and external input to drive meaningful, enduring change on environmental, social, and governance (ESG) challenges globally.

Stakeholder engagement

3M's stakeholder engagement strategy on priority topic areas continues to evolve. We continually look to our stakeholders to help us increase our understanding, broaden our awareness, seek technical input and expertise, and evaluate possible collaborations and strategic relationships. We rely on their counsel and expertise to help guide us. We believe stakeholder engagement should be based on candid and authentic dialogue — grounded in 3M's Principles — and should contribute to the evolution of our strategic priorities. Stakeholder engagement varies greatly by geography, type, and function. For example, we frequently engage 3M employees globally through sustainability communications and events with diverse content based on our materiality topics.

How we work with stakeholders

Stakeholder	How we engage	Further information on engagement
Employees and job seekers	- Respecting human rights and diversity, equity, and inclusion - Providing a safe and healthy work environment - Providing competitive compensation and benefits - Attracting and retaining the highest level of talent by being a company for which employees are proud to work	Employee programs DE&I Communities Human rights Environmental, health, and safety management
Investors and shareholders	- Delivering profitable returns on investment - Disclosing timely, concise, and relevant information (related to economic, environmental, and social issues) - Responding to inquiries - Upholding corporate values	Investor relations webpage ESG summary
Customers and partners	- Providing diverse, innovative product solutions that help our customers deliver on their promises - Offering a diversified portfolio of high-quality products - Providing products with sustainability attributes to address and help solve global challenges	Innovation management Our customers Our products
Government/regulators, nonprofit organizations, NGOs, and experts	- Complying with laws, regulations, and policies - Supporting and engaging in development and modification changes - Providing support to advance and solve global issues - Partnering to understand societal concerns	Governance Climate and energy DE&I Communities Circular materials Suppliers
Local communities and consumers	- Supporting and engaging in citizenship activities across our value chain - Providing economic and social value to communities while minimizing environmental impact - Supporting communities to thrive	Communities Environmental, health, and safety management
Academic/scientific organizations	Engaging in technical scientific research to develop innovative solutions for society	Circular materials Climate and energy Innovation management Our customers
Suppliers	- Partnering with suppliers and contractors that meet or exceed expectations - Supporting collective efforts to deliver business results - Collaborating to identify, resource, and amplify sustainability initiatives - Respecting human rights of workers	Suppliers Human rights Circular materials Climate and energy

Materiality assessment

Every other year starting in 2014, 3M has commissioned GlobeScan, an independent research consultancy, to assist us in better understanding our stakeholders' perspectives on key issues and assessing our corporate reputation and leadership opportunities.

In 2021, we aligned our priorities based on our most recent 2020 assessment, which explored stakeholder perceptions of 3M's sustainability strategy and its three pillars: Science for Circular, Science for Climate, and Science for Community. Stakeholders included customers, suppliers, NGOs, corporate/private sector, academics, consultants, government, media, finance, trade associations, and think tanks, and were representative of 3M's four business groups and all regions of operations. At the same time, 3M conducted a similar process through an internal online employee survey.

Following the GlobeScan assessment, we analyzed insights and inputs from stakeholders and developed the Sustainability Priority Matrix. The matrix also demonstrates how our Sustainability Goals align with the United Nations 2030 Agenda for Sustainable Development, which includes 17 Sustainable Development Goals (SDGs).

Each priority topic is categorized into one of three tiers based on importance and reputation:

- 1 **Tier 1:** most critical issues with highest potential impact
- 2 **Tier 2:** important issues with high potential impact
- 3 **Tier 3:** issues with average level of importance

Explore the [Priority Matrix](#).

3M Sustainability Priority Matrix

Priority topic & tier	Our actions	Links to additional information	Goals & commitments	Related SDG
Science for Circular	Plastic/ packaging waste 1	Circular materials Sustainable packaging solutions	Require a Sustainability Value Commitment (SVC) for every new product. ¹ Reduce manufacturing waste by 10%, indexed to sales, by 2025. Reduce dependence on virgin fossil-based plastic by 125 million pounds by 2025. ⁵	 12.5
	Accumulation of toxic substances 1	Innovation management Circular materials Product Safety, Quality, and Stewardship Principle Chemicals Management Policy	Require a Sustainability Value Commitment (SVC) for every new product. ¹	 3.9
	Limited availability of sustainable products/ services 1	Circular materials 3M Sustainability Value Commitment	Require a Sustainability Value Commitment (SVC) for every new product. ¹	 12.2, 12.5  8.4  9.4

3M Sustainability Priority Matrix (cont.)

Priority topic & tier	Our actions	Links to additional information	Goals & commitments	Related SDG
Science for Circular	Water quality 1 At 3M, we strive to use technology and expertise to promote a future of “water circularity,” a future where water stress is eliminated, resources are circulated, and nature is regenerated. Water circularity is the foundation to the aspiration of net positive water impact (NPWI). It represents a vision for how a water user interacts with a basin, its ecosystem, and its communities. Delivering NPWI reduces water stress in three aspects: availability, quality, and accessibility. NPWI is achieved when water contributions exceed impacts on water stress(es) in the same basin. 3M’s goals chart our path forward toward NPWI as we continue to improve our operational footprint.	<u>Circular materials</u> <u>3M commits to achieving carbon neutrality, reducing water use, and improving water quality</u>	For 3M’s global manufacturing operations, enhance the quality of water returned to the environment from industrial processes by 2030.^{3,4} Our initial focus is on implementing state-of-the-art water purification technology at the largest water use locations globally and having them operational in 2024.	 6.3
	Waste from manufacturing/operations 2 We believe it is our responsibility to carefully integrate renewable and recycled materials, and enhance the circularity of water, packaging, and waste as we focus on designing solutions that do more with less material, advancing a global circular economy. We reduce, recover, reuse, and recycle byproducts and other surplus material in our operations whenever feasible. When not feasible, we responsibly dispose of waste materials.	<u>Circular materials</u>	Reduce manufacturing waste by an additional 10%, indexed to sales, by 2025. Achieve zero landfill status at more than 30% of manufacturing sites by 2025.	 12.5
	Shortages of available fresh water 2 In 2015, 3M set a goal to reduce global water usage by 10%, indexed to sales. In 2021, we expanded our previous goal to reduce global water usage by the following amounts: 10% by 2022, 20% by 2025, and 25% by 2030, indexed to sales. Building a water-resilient world for our communities, our ecosystems, our companies, and the global economy is the vision of the Water Resilience Coalition, which 3M joined in 2021 to serve on the Leadership Committee.	<u>Circular materials</u> <u>3M commits to achieving carbon neutrality, reducing water use, and improving water quality</u> <u>3M joins Water Resilience Coalition, endorses CEO Water Mandate</u>	Reduce global water usage by the following amounts: 10% by 2022, 20% by 2025, and 25% by 2030, indexed to sales.² Engage 100% of water-stressed/scarce communities where 3M manufactures on community-wide approaches to water management by 2025.	 6.4, 6.b
	Scarcity of raw materials 2 3M continually looks for ways to recover, reuse, and recycle byproducts and other surplus material, and we include renewable and recycled materials in our products when we can. Increasing usage of renewable and recycled raw materials through product design and operational considerations helps us support the circular economy. We achieve this through multiple mechanisms, such as our Sustainability Value Commitments and engagement with our suppliers.	<u>Circular materials</u> <u>Suppliers</u> <u>Our commitment to sustainable forestry</u> <u>Supplier Sustainability Solutions</u> <u>3M Sustainability Value Commitment</u>	Drive supply chain sustainability through targeted raw material traceability and supplier performance assurance by 2025. Require a Sustainability Value Commitment (SVC) for every new product.¹ Reduce dependence on virgin fossil-based plastic by 125 million pounds by 2025.⁵	 12.2  15.2

3M Sustainability Priority Matrix (cont.)

Priority topic & tier	Our actions	Links to additional information	Goals & commitments	Related SDG
Science for Climate	Climate change 1 We are committed to innovate to decarbonize industry, accelerate climate solutions, and improve our environmental footprint. In 2021, 3M announced that we expect to invest approximately \$1 billion over the next 20 years to support environmental goals, including achieving carbon neutrality in our operations by 2050.	<u>Climate and energy</u> <u>3M commits to achieving carbon neutrality, reducing water use, and improving water quality</u> <u>3M and UN Climate Change to address climate challenges, drive collective solutions</u> <u>3M recognized by RE100 for renewable energy efforts</u> <u>3M Invests in TPG Rise Climate Fund</u>	Reduce Scope 1 and 2 market-based GHG emissions by at least 50% by 2030, 80% by 2040, and achieve carbon neutrality in our operations by 2050.⁷ Help our customers reduce their GHGs by 250 million tons of CO₂ equivalent emissions through use of 3M products by 2025.	 13.1
	Poor air quality 1 An important component of 3M's sustainability strategy is our commitment to improving air quality globally while delivering on our customers' needs and expectations for high-performance products. 3M has developed internal programs to minimize our air emissions. We collaborate with the international non-governmental organization, Clean Air Asia, on science-based air quality solutions for New Delhi, India, and Metro Manila, Philippines.	<u>Climate and energy</u> <u>Clean Air Asia</u>	Require a Sustainability Value Commitment (SVC) for every new product.¹	 3.9  11.6
	Excessive energy use, including declining energy resources 1 We are committed to continuously improving energy efficiency, leveraging engineering expertise and advances, driving site-level efficiency improvements, maintaining top management support, and protecting 3M's reputation. We serve our customers through a wide range of innovative products that help them improve energy efficiency and reduce their greenhouse gas emissions.	<u>Climate and energy</u> <u>Energy-based solutions help tackle challenge of climate change</u>	Improve energy efficiency by 30%, indexed to sales, by 2025. Increase renewable energy to 50% of total electricity use by 2025 and to 100% by 2050. Help our customers reduce their GHGs by 250 million metric tons of CO₂ equivalent emissions through the use of 3M products by 2025.	 7.3
	Responding to natural disasters 3 As natural disasters continue to increase in frequency and severity, 3M continually provides essential supplies and funds to assist partners and aid workers in their swift responses.	<u>Communities</u> <u>When disaster strikes, 3M stands ready to spring into action</u> <u>Whitepaper: Natural disaster cleanup hazards and rebuilding ideas</u> <u>Emergency preparedness PPE guidance</u>	Invest cash and products for education, community, and environmental programs by 2025.	 2.1

Human health, including community health and safety, spread of human diseases, and food safety 2	3M recognizes the crucial role of science in improving lives, protecting health and safety, and helping solve global challenges. 3M promotes a culture of employee health and well-being through disease prevention programs, on-site clinical services, employee assistance programs, and comprehensive health care benefits. To help build sustainable communities, our strategic investments include support for basic human needs. For the global health care industry, we combined our deep health care expertise with an unparalleled breadth of technology platforms to transform outcomes for patients and professionals. We stand behind our commitment to better health care through more sustainable choices, world-class education, and advancing health equity. Our skills-based volunteer program now includes 3M Impact Health Care, where we are using our expertise to help address health care inequities. We continued to help support the fight against COVID-19 throughout 2021 by expanding our production capacity of N95 respirators and reaching a global capacity of 3 billion respirators annually by the end of the year. We also dedicated technical resources like our female-led 3M Global Respirator Decontamination Team to help evaluate decontamination methods of 3M disposable respirators and hoods. Finally, we continued to boost COVID-19 vaccine and therapeutic development and production by increasing our surge capacity of 3M purification and filtration technologies that support these manufacturing processes. 3M offers educational content to help customers deepen their scientific expertise on critical health and safety topics, including health care, personal safety, and food safety.	<u>Innovation management</u> <u>Our customers</u> <u>Communities</u> <u>Our products</u> <u>3M Impact</u> <u>Clean Air Asia</u> <u>3MSM Health Care Academy</u> <u>How 3M is helping the world respond to COVID-19</u> <u>Mitigating the risk of infectious disease spread through contamination prevention</u> <u>How 3M is using Social Determinants of Health to provide actionable insights about community health crises</u> <u>3M champions safe, equitable mobility for all with the Vision Zero Network</u>	Require a Sustainability Value Commitment (SVC) for every new product.¹ Invest cash and products for education, community, and environmental programs by 2025.
